

Project Name

Bergknoff Property

Client

Mr. Hugh Bergknoff

Services Provided

Expert Review of Remediation Costs and Activities for a Remediation Contractor

Project Description

SAI was retained by the client to assist in litigation concerning the recovery of costs incurred while performing a cleanup of a heating oil spill at the site.

Approach

SAI performed an expert review of remediation costs and activities of a remediation contractor, retained by an insurance company, which had performed a cleanup of the Bergknoff property after a heating oil spill. An expert report was submitted by SAI to the client's attorney stating, in part, that it was the Client, not the remediation contractor, who performed a majority of the cleanup actions. SAI ascertained that the remediation contractor retained by the insurance company did not honor its obligation to perform the remediation work.
